Profile Summary

Full Stack Engineer with experience building and scaling SaaS platforms from the ground up. Skilled in JavaScript, TypeScript, and Python with expertise in Next.js, React Native, and Supabase. Strong focus on secure backend systems, intuitive UIs, SEO architecture, and AI-driven solutions. Passionate about performance, subscription systems, and delivering user-first applications with measurable impact.

Technical Skills

Languages: JavaScript (ES6+), TypeScript, Python, SQL

Frontend: React, Next.js, Tailwind, React Native

Backend: Node.js, Express, Django, Flask

Databases: PostgreSQL, MongoDB, Supabase, Firebase, Vector DB

Cloud & Tools: Vercel, AWS, Docker, Git, OpenAI APIs, Cursor

Core: REST APIs, Authentication, RBAC, SEO, Subscription Systems

Experience

Full Stack Engineer – Stack Tracer | 2025

- Built a secure SaaS workspace platform with Next.js, TypeScript, Supabase, and Tailwind.
- Implemented role-based access control (RBAC) and subscription features with Supabase & Stripe.
- Designed collaborative features to improve dev workflow efficiency and enterprise adoption.
- Delivered a scalable, high-performance solution optimized for security, responsiveness, and business growth.

Founding Full Stack Engineer – Sober Friend | 2024–Present

- Built a mental health companion, recovery tracker, and SEO-driven directory (10K+ weekly impressions) with Cursor AI.
- Integrated OpenAI APIs for 24/7 AI mentor chat support with vector db.
- Engineered Stripe subscription tiers with trials and upgrades.
- Optimized for mobile-first accessibility, scalability, and engagement.

Projects

- **AI Mentor Chatbot** – GPT-4o + Supabase message memory, vector DB, role-based prompts, and secure persistence.
- **Business Listing Platform** – SEO-driven directory for treatment centers with subscription management and growth scaling.
